PRF 301 - Version 3 Page 1 of 12

SAFETY DATA SHEET

PRF 301

The safety data sheet is in accordance with Commission Regulation (EU) 2015/830 of 28 May 2015 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

SECTION 1: Identification of the substance / mixture and of the company / undertaking

 Date issued
 16.11.2016

 Revision date
 06.08.2021

1.1. Product identifier

Product name	PRF 301
Article no.	PE30122

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the substance / mixture Lubricant

Main intended use PC-TEC-11 Lubricants, greases, release agents

1.3. Details of the supplier of the safety data sheet

Company name Taerosol Oy Postal address Hampuntie 21 Postcode 36220 City Kangasala Country Finland Telephone number +358 33565600 Website www.taerosol.com Enterprise No. 02847686

1.4. Emergency telephone number

Emergency telephone Telephone number: 112 / Finnish Poison Information Center: 0800 147 111, 24/7

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to Aerosol 1; H222

Regulation (EC) No 1272/2008

[CLP / GHS] Aerosol 1; H229

PRF 301 - Version 3 Page 2 of 12

Skin Irrit. 2; H315

STOT SE 3; H336

Aquatic Chronic 2; H411

Additional information on classification

For the full text of the H-statements mentioned in this Section, see Section 16.

2.2. Label elements

Hazard pictograms (CLP)

Composition on the label

Naphtha (petroleum), hydrotreated, light

Signal word

Danger

Hazard statements

H222 Extremely flammable aerosol.

H229 Pressurised container: May burst if heated.

H315 Causes skin irritation.

H336 May cause drowsiness or dizziness.

H411 Toxic to aquatic life with long lasting effects.

Precautionary statements

P102 Keep out of reach of children.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition

sources. No smoking.

P211 Do not spray on an open flame or other ignition source.

P251 Do not pierce or burn, even after use. P262 Do not get in eyes, on skin, or on clothing.

P410+P412 Protect from sunlight. Do no expose to temperatures exceeding 50

°C / 122°F.

2.3. Other hazards

PBT / vPvB See section 12.5

SECTION 3: Composition / information on ingredients

3.2. Mixtures

Substance	Identification	Classification	Contents	Notes
Naphtha (petroleum) , hydrotreated, light	CAS No.: 64742-49-0	Flam. Liq. 2; H225 Skin Irrit. 2; H315 STOT SE 3; H336 Asp. Tox. 1; H304 Aquatic Chronic 2; H	40 - 60 % 411	
Substance comments		Aerosol propellants: Propane Butane For the full text of the H-statements mentioned in this Section, see Section 16.		

SECTION 4: First aid measures

4.1. Description of first aid measures

PRF 301 - Version 3 Page 3 of 12

General	IF exposed or concerned: Get medical advice/attention. Get medical advice/attention if you feel unwell. Take off contaminated clothing and wash it before reuse.
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.
Skin contact	Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention.
Eye contact	Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
Ingestion	Rinse mouth. Immediately call a POISON CENTER or doctor/physician.

4.2. Most important symptoms and effects, both acute and delayed

General symptoms and effects	Aspiration hazard if swallowed - can enter lungs and cause damage. Skin	
	irritation Drowsiness Dizziness	

4.3. Indication of any immediate medical attention and special treatment needed

Medical treatment	Treat symptomatically.
-------------------	------------------------

SECTION 5: Firefighting measures

5.1. Extinguishing media

	Suitable extinguishing media	Alcohol-resistant foam ABC powder Carbon dioxide (CO2)
I	Improper extinguishing media	Water spray

5.2. Special hazards arising from the substance or mixture

ŀ	Fire and explosion hazards	Heating may cause an explosion.
ŀ	Hazardous combustion products	Carbon dioxide (CO2) Carbon monoxide (CO)

5.3. Advice for firefighters

Personal protective equipment	Protective equipment and precautions for firefighters In accordance with the requirements of EN 469, firefighter's clothing with a helmet, protective boots and gloves provides a basic level of protection against chemical accidents.
Fire fighting procedures	Use water spray to cool unopened containers. In case of major fire and large quantities: Evacuate area. Fight fire remotely due to the risk of explosion.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

General measures	Eliminate all ignition sources if safe to do so. Evacuate area. Stop leak if safe to do so. Ensure adequate ventilation. Avoid inhalation, ingestion and contact with skin and eyes. Use personal protective equipment.
For emergency responders	Use personal protective equipment.

PRF 301 - Version 3 Page 4 of 12

6.2. Environmental precautions

Environmental precautionary Try to prevent the material from entering drains or water courses. Avoid release to the environment.

6.3. Methods and material for containment and cleaning up

Containment	Prevent further leakage or spillage if safe to do so.	
Clean up	Absorb spillage to prevent material damage.	
Other information	Non-sparking tools should be used. Pay attention to the spreading of gases especially at ground level (heavier than air) and to the direction of the wind.	

6.4. Reference to other sections

Other instructions See section 7, 8, 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Handling
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Handle in accordance with good industrial

hygiene and safety practice. When using, do not eat, drink or smoke. Do not taste or swallow. Wash hands before breaks and immediately after handling the product. Wash clothing before reuse. Remove all sources of ignition. Take precautionary measures against static discharges. Non-sparking tools should be used. Use only outdoors or in a well-ventilated area. Do not breathe vapours/

spray.

7.2. Conditions for safe storage, including any incompatibilities

Storage

Remove all sources of ignition. Protect from sunlight. Do not expose to temperatures exceeding 50 °C /122 °F. No smoking. Store in a well-ventilated place. Keep container tightly closed. Store locked up. Keep only in original container. Do not store together with oxidizing and self-igniting products. Keep

away from oxidising agents and strongly acid or alkaline materials. Keep away from food, drink and animal feedingstuffs.

7.3. Specific end use(s)

Specific use(s) None known.

SECTION 8: Exposure controls / personal protection

8.1. Control parameters

Substance	Identification	Exposure limits	TWA Year
Naphtha (petroleum) ,	CAS No.: 64742-49-0	Country of origin: FI	
hydrotreated, light		Limit value (8 h) : 100 mg/	
		m³	
		Recommended monitoring	
		procedures: This	
		information is not available.	

PRF 301 - Version 3 Page 5 of 12

Source: Decree of the Ministry of Social Affairs and Health on concentrations known to be harmful (654/2020)

8.2. Exposure controls

Precautionary measures to prevent exposure

Appropriate engineering controls	See section 7.1, 7.2
----------------------------------	----------------------

Eye / face protection

Eye protection equipment	Description: Usual safety precautions while handling the product will provide adequate protection against this potential effect. Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place.
	Reference to relevant standard: EN 166

Hand protection

nand protection	
Breakthrough time	Comments: As the product is a mixture of several substances, the durability of the glove materials cannot be calculated in advance and has to be tested before use. Take note of the information given by the producer concerning permeability and break through times, and of special workplace conditions (mechanical strain, duration of contact). Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.
Hand protection equipment	Description: Protective gloves Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. It is good practice in industrial hygiene to avoid contact with solvents by using appropriate protective measures whenever possible. Reference to relevant standard: EN 374, EN 420

Skin protection

Recommended protective clothing	Description: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. It is good practice in industrial hygiene to avoid contact with solvents by using appropriate protective measures whenever possible.
	protective measures whenever possible.

Respiratory protection

Respiratory protection	
Recommended respiratory protection	Description: Do not breathe vapours/spray. Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Use respirator when performing operations involving potential exposure to vapour of the product. In case of inadequate ventilation wear respiratory protection. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used. Reference to relevant standard: EN 140, EN 141, EN 149, EN 14387

PRF 301 - Version 3 Page 6 of 12

Thermal hazards

Thermal hazards Not applicable.

Appropriate environmental exposure control

Environmental exposure controls

Try to prevent the material from entering drains or water courses. Discharge into the environment must be avoided.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Form

Colour clear

Odour hydrocarbon-like

Odour limit Reason for waiving data: No data.

рΗ Comments: Not applicable.

Melting point / melting range Value: - 10 °C Boiling point / boiling range Value: < - 20 °C Flash point

Evaporation rate Reason for waiving data: No data.

Flammability Extremely flammable aerosol.

Lower explosion limit with unit of

measurement

Upper explosion limit with units of

measurement

Vapour pressure

Vapour density

Relative density

Solubility

Partition coefficient: n-octanol/

water

Auto-ignition temperature

Decomposition temperature

Viscosity

Explosive properties Oxidising properties

Aerosol dispenser: spray aerosol

Value: < 0 °C

Reason for waiving data: No data.

Reason for waiving data: No data.

Reason for waiving data: No data. Reason for waiving data: No data.

Reason for waiving data: No data. Comments: This information is not available.

Reason for waiving data: No data.

This information is not available.

This information is not available.

9.2. Other information

Other physical and chemical properties

Physical and chemical properties This information is not available. PRF 301 - Version 3 Page 7 of 12

SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity This information is not available.

10.2. Chemical stability

Stability Stable

10.3. Possibility of hazardous reactions

Possibility of hazardous reactions See section 5.2

10.4. Conditions to avoid

Conditions to avoid See section 7.1, 7.2

10.5. Incompatible materials

Materials to avoid See section 7.2

10.6. Hazardous decomposition products

Hazardous decomposition products

See section 5.2

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Substance Naphtha (petroleum), hydrotreated, light

Acute toxicity Effect tested: LD50

Route of exposure: Oral Method: OECD 401 Value: 16750 mg/kg Animal test species: Rat

Effect tested: LD50 Route of exposure: Dermal Method: OECD 402 Value: 3350 mg/kg

Animal test species: Rabbit

Effect tested: LC50

Route of exposure: Inhalation.

Method: OECD 403 Duration: 4 hour(s) Value: 259000 mg/m³ Animal test species: Rat

Other information regarding health hazards

Assessment of acute toxicity, classification

Based on available data, the classification criteria are not met.

PRF 301 - Version 3 Page 8 of 12

Assessment of skin corrosion / Irritating to skin. irritation, classification Assessment of eye damage or Based on available data, the classification criteria are not met. irritation, classification Assessment of respiratory Based on available data, the classification criteria are not met. sensitisation, classification Assessment of skin sensitisation, Based on available data, the classification criteria are not met. classification Assessment of germ cell Based on available data, the classification criteria are not met. mutagenicity, classification Assessment of carcinogenicity, Based on available data, the classification criteria are not met. classification Assessment of reproductive Based on available data, the classification criteria are not met. toxicity, classification Assessment of specific target May cause drowsiness or dizziness. organ toxicity - single exposure, classification Assessment of specific target Based on available data, the classification criteria are not met. organ toxicity - repeated exposure, classification Assessment of aspiration hazard, Aspiration hazard if swallowed - can enter lungs and cause damage. classification

Symptoms of exposure

In case of ingestion	See section 4.2
In case of skin contact	See section 4.2
In case of inhalation	See section 4.2
In case of eye contact	See section 4.2

11.2 Other information

Endocrine disruption This information is not available.

SECTION 12: Ecological information

12.1. Toxicity

Substance Aquatic toxicity, fish Toxicity type: Acute Value: 13,4 mg/l Effect dose concentration: LL50 Test duration: 96 hour(s) Method: QSAR Toxicity type: Chronic Value: 2,99 mg/l Effect dose concentration: NOELR Test duration: 28 day(s) Species: Early-life Stage	12.1. Toxicity	
Value: 13,4 mg/l Effect dose concentration: LL50 Test duration: 96 hour(s) Method: QSAR Toxicity type: Chronic Value: 2,99 mg/l Effect dose concentration: NOELR Test duration: 28 day(s)	Substance	Naphtha (petroleum), hydrotreated, light
	Aquatic toxicity, fish	Value: 13,4 mg/l Effect dose concentration: LL50 Test duration: 96 hour(s) Method: QSAR Toxicity type: Chronic Value: 2,99 mg/l Effect dose concentration: NOELR Test duration: 28 day(s)

PRF 301 - Version 3 Page 9 of 12

Method: OSAR Substance Naphtha (petroleum), hydrotreated, light Aquatic toxicity, algae Toxicity type: Acute Value: 9,9 mg/l Effect dose concentration: EL50 Test duration: 72 hour(s) Method: QSAR Substance Naphtha (petroleum), hydrotreated, light Aquatic toxicity, crustacean Toxicity type: Acute Value: 23,4 mg/l Effect dose concentration: EL50 Test duration: 48 hour(s) Method: QSAR Toxicity type: Chronic Value: 5,2 mg/l Effect dose concentration: NOELR Test duration: 21 day(s) Method: QSAR

12.2. Persistence and degradability

Substance	Naphtha (petroleum), hydrotreated, light
Biodegradability	Method: OECD 301F Comments: Rapidly biodegradable.
Substance	Naphtha (petroleum), hydrotreated, light
Abiotic degradation in air	Evaluation: May decompose on exposure to light.

12.3. Bioaccumulative potential

Bioaccumulation, evaluation This information is not available.

12.4. Mobility in soil

Mobility This information is not available.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB	This information is not available.
assessment	

12.6. Endocrine disrupting properties

Endocrine disrupting properties This information is not available.

12.7. Other adverse effects

Additional ecological information This information is not available.

SECTION 13: Disposal considerations

PRF 301 - Version 3 Page 10 of 12

13.1. Waste treatment methods

Appropriate methods of disposal for the chemical	Dispose of in accordance with local regulations. Dispose of product residue in accordance with the instructions of the person responsible for waste disposal. Try to prevent the material from entering drains or water courses.
Appropriate methods of disposal for the contaminated packaging	Dispose of contents/container in accordance with local regulation. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not pierce or burn, even after use.
EU Regulations	Directive 2008/98/EC of the European Parliament and of the Council on waste and repealing certain Directives

SECTION 14: Transport information

14.1. UN number

ADR/RID/ADN	1950
IMDG	1950
ICAO/IATA	1950

14.2. UN proper shipping name

Proper shipping name English ADR/RID/ADN	AEROSOLS
ADR/RID/ADN	AEROSOLS
IMDG	AEROSOLS
ICAO/IATA	AEROSOLS, FLAMMABLE

14.3. Transport hazard class(es)

ADR/RID/ADN	2.1
Classificaton code ADR/RID/ADN	5F
Comments	2.1

14.4. Packing group

-

14.5. Environmental hazards

Comments	Toxic to aquatic life with long lasting effects.
----------	--

14.6. Special precautions for user

Special safety precautions for user	This information is not available.
-------------------------------------	------------------------------------

14.7. Maritime transport in bulk according to IMO instruments

Product name AEROSOLS, FLAMMABLE	
----------------------------------	--

Additional information

PRF 301 - Version 3 Page 11 of 12

Hazard label ADR/RID/ADN	2.1
Hazard label IMDG	2.1
Hazard label ICAO/IATA	2.1

ADR/RID Other information

Tunnel restriction code	D

EmS	F-D, S-U
Limited quantity	1000 mL
Excepted quantity	E0
Special provisions	63,190, 277, 327, 344, 381,959

ICAO/IATA Other information

Limited quantity	30 kg
Excepted quantity	E0
Special provisions	A145 A165 A802
Additional information ICAO/IATA	Cargo: max. 150 kg (203), Pas.: max. 75 kg (203)

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations / legislation specific for the substance or mixture

Legislation and regulations	Council Directive 75/324/EEC on the approximation of the laws of the Member
	States relating to aerosol dispensers The rules which cover amongst other things
	the requirement for ventilation, protective clothing, personal protective equipment
	etc. can be obtained from the National Occupational Health and Safety Board.

15.2. Chemical safety assessment

Chemical safety assessment	No
performed	

PRF 301 - Version 3 Page 12 of 12

SECTION 16: Other information

List of relevant H-phrases (Section 2 and 3)	H222 Extremely flammable aerosol. H225 Highly flammable liquid and vapour. H229 Pressurised container: May burst if heated. H304 May be fatal if swallowed and enters airways. H315 Causes skin irritation. H336 May cause drowsiness or dizziness. H411 Toxic to aquatic life with long lasting effects.
CLP classification, notes	Calculation method.
Training advice	Provide adequate information, instruction and training for operators. Take notice of the directions of use on the label. To avoid risks to man and the environment, comply with the instructions for use.
Key literature references and sources for data	Information taken from reference works and the literature. http://echa.europa.eu http://eur-lex.europa.eu
Information added, deleted or revised	Relevant changes compared to the previous version of the safety data sheet are indicated with verticle lines in the left margin.
Version	3
Comments	The information contained herein is based on the present state of our knowledge and does therefore not guarantee certain properties.
